

AGANA

JEWELRY

[BETWEEN HARMONY AND CHAOS]

AGANA are [attractors] based on nature of matter. Every handcrafted AGANA jewelry item has own mood, power and name. [Attractor] of chaos theory that means lots of different conditions to which everything in this world tends over time. [Attractor] that emphasizes the power and beauty of personality between harmony and chaos.

AGANA was founded by jewelry designer Elena Miretskaya and art-director Sheina Miretskaya as brand of inner perception outside common standards and mass market industry. AGANA combines author's design and classical high quality jewelry techniques to create the atmosphere of traditional family jewelry brand. AGANA aims to jewelcrafting as it was a few centuries ago when every item was a unique handcrafted masterpiece, very personal, and was transmitted in family through generations.

AGANA is about the principle of nature and human being – [contemplation and destruction]. Every matter goes through these conditions, flows from one to other, again and again, every minute. Since the start of world destruction brings harmony and harmony is the start of destruction. This contradictory power is the beauty, which AGANA chants.

AGANA creates forms and textures based on opposites. It's a combination of jewelry masterpiece and intentional artful negligence. It's a combination of precious gems and avant-garde abstract texture. It's a combination of external and internal. It's a combination of physics and kabbalah. It's a combination of harmony and chaos, expressed through jeweler's hands and translated through hands of person wearing it.

AGANA works in 3 main directions: every year collections, jewelry collaborations with fashion brands and custom made service. Every created item is fully handcrafted with no machine work using precious metals and gems and has no 100% similar copy.
