

AGANA

JEWELRY

[BETWEEN HARMONY AND CHAOS]

AGANA was founded in 2015 by jewelry designer Elena Miretskaya and art-director Sheina Miretskaya as brand of inner perception outside common standards and mass-market industry.

AGANA jewelry is a niche family brand, the idea of which founders have gathered from Judaism, Kabbalah, family history and their own conception of jewelry creating.

AGANA combines author's design and classical high quality jewelry techniques and aims to restoration of jewelcrafting as it was a few centuries ago when every item was a unique handcrafted masterpiece, very personal, and was transmitted in family through generations. Every created item is fully handcrafted with no machine work using precious metals and gems such as sapphires, rubies, alexandrites, citrines and rauchtopazes, and has no 100% similar copy.

Every handcrafted AGANA jewelry item has own mood, power and name in Hebrew. AGANA items are [attractors] of chaos theory, that reflects principle of nature and human being – [contemplation and destruction]. Every matter goes through these conditions, flows from one to other, again and again, every minute. Since the start of world destruction brings harmony and harmony is the start of destruction. This contradictory power is the beauty which AGANA chants creating forms and textures based on opposites.

AGANA is a combination of jewelry masterpiece and intentional artful negligence. It's a combination of precious gems and avant-garde abstract texture. It's a combination of external and internal. It's a combination of physics and Kabbalah. It's a combination of harmony and chaos, expressed through jeweler's hands and translated through hands of person wearing it.

Brand AGANA works in 3 main directions in Ukraine and Israel: every year collections, jewelry collaborations with fashion brands and custom made service.
